## ENTIRE U.S. PLACED ON HEIGHTENED **TERRORIST THREAT** ENVIRONMENT STATUS

In June, the National Terrorism Advisory System (NTAS) announced that the entire United States is currently in a heightened terrorist threat environment...(See p. 2)

## HOW YOUR CAR CAN REALLY LOVE YOU BACK!

Americans have long been obsessed with cars, with the connection between owning a car and enjoying personal freedom ingrained in our culture. For many, a car is not just a means of transportation, but a symbol of independence and self-sufficiency. However, a recent survey revealed that not all is well in the world of car ownership. (Continued p. 4)

# Entire U.S. Placed on Heightened Terrorist Threat Environment Status

In June, the National Terrorism Advisory System (NTAS) announced that the entire United States is currently in a heightened terrorist threat environment, with a yellow threat level, which continues now. This indicates a significant risk of terrorist attacks. The NTAS provides either an imminent threat alert or an elevated threat alert when threats are present. Shawn Cavalli, a security expert at Armitex, emphasizes the importance of utilizing protective measures such as ballistic glass and window security film in light of this announcement.

It is important to understand the different types of threat alerts issued by the NTAS. The imminent threat alert warns of a credible, specific, and impending terrorist threat against the United States, while the elevated threat alert warns of a credible terrorist threat against the country. Both of these alerts serve as a reminder for individuals and businesses to remain vigilant and take necessary precautions to protect themselves and their communities.

Cavalli stresses the importance of implementing protective measures in the face of this heightened threat environment. "Ballistic glass and window security film are essential in providing an added layer of protection against potential terrorist attacks. They are designed to withstand high-impact forces to prevent glass from shattering, keeping individuals

and property protected," says Cavalli. Glass, without protection, is a building or vehicle's weakest entry point.

In light of the current threat level, it is crucial for individuals and businesses to take proactive measures to ensure their safety and security. Armitex's ballistic glass and window security film are two of the newest approaches in protection anywhere you find glass windows and doors. As the threat of terrorism continues to loom, it is important to remain vigilant and take necessary precautions to keep ourselves and our communities safe.

# While You Are Sleeping... Staying Alive During an Attack

*Once a threat is inside, your options become very limited*

San Antonio, May 2024 - In the quiet hours of the night, a couple in San Antonio were suddenly awoken by the sound of gunshots. As they lay in their bed, they realized that their home was under attack. The attackers had fired multiple rounds through their bedroom window, leaving them with multiple gunshot wounds. This terrifying incident serves as a reminder that danger can strike at any time, even while we are sleeping.

In today's world, it is crucial to be prepared for unexpected attacks. While there is no foolproof way to prevent an attack, there are measures that can be taken to increase the chances of survival. One of the best ways to stay alive during an attack is by keeping threats out. Because once a threat is inside, your options become very limited. This is where Armittek ballistic glass and window security film come into play.

Armittek is a leading provider of ballistic glass and security products designed to withstand high-velocity impacts from bullets, blasts, and other threats. This innovative technology is used in government buildings, banks, and other high-security facilities, and is also available for affordable residential use. By installing Armittek's products for your windows, you significantly increase chance of survival by shielding yourself from attacks.

In the wake of the recent attack in San Antonio, and increasing crime rates everywhere, Armittek urges individuals and families to consider investing in ballistic glass and window security film. While we cannot control when or where an attack may occur, we can take steps to protect ourselves and our loved ones.

If you do verify a threat, try the following:

- Avoid confronting them, if possible
- Quietly try to get away from them
- Try to hide behind a locked door
- Try to contact authorities without disclosing your location to the person or persons threatening you

As the saying goes, "it's better to be safe than sorry." Armittek's products provide an added layer of protection, peace of mind, and valuable time for help to arrive, especially during the vulnerable hours of sleep. Don't wait until it's too late - take action now to stay alive during an attack.

# How Your Car Can Really Love You Back!

(Continued from p.1) According to the Survey Center on American Life, nearly two-thirds of drivers admitted to experiencing road rage while behind the wheel. Some of these has led to thousands of injuries and deaths. This alarming statistic highlights the negative impact that driving can have on our mental and emotional well-being.

But what if there is a way to change this dynamic and have our cars love us back in an unexpected way?

Love is often equated with safety and protection and Armittek ballistic glass and window security film, revolutionary technologies that not only protect you from external threats, but also create a safe and calming environment, are the optimum solutions.

These innovative products are designed to withstand high-impact forces, stopping road rage incidents, smash-and-grab attempts, tools, debris from storms, vehicle accidents, and more.

\*<https://www.americansurveycenter.org>

Armittek affordable ballistic glass and ballistic panels for car doors can stop bullets, bats, crowbars, rocks, bricks, fists, and nearly anything that can easily break through regular glass, or that can penetrate car doors.

While Armittek Smash and Grab® film may not specifically stop bullets, it incredibly stops just about everything else that ballistic glass keeps from penetrating your vehicle's glass, protecting you from injuries, thefts, and other dangers.

Additionally, Armittek Smash and Grab® film is extremely affordable. Add Armittek Windshield Armor to your car as well, to help protect your windshield from rock chips and cracks.

With ballistic glass, ballistic door panels, Smash and Grab® Film, and Windshield Armor, you have an incredible fortress against just about any threat on the road.

With Armittek, your car also becomes a sanctuary, a place where you can truly relax and enjoy the ride.

As we continue to navigate the challenges of daily life, it's important to find ways to take care of ourselves and our cars. Armittek ballistic glass and film offers a solution for car owners to not only protect their vehicles, but also enhance their driving experience. So let your car love you back, and choose Armittek for an incredibly safe and peaceful ride.

# The 25 Most Dangerous Places in the U.S. - Is Your City on the List?

Are you wondering where the most murders and property crimes occur, based on data provided by the FBI? Especially with rising crime rates?

Would it surprise you to learn that certain states have as many as two or three cities that make up the top 25 most dangerous places to live?

Some of the most common crimes deal with drugs, assault, burglary, theft, robbery, vandalism, sexual assault, stalking, kidnapping, homicide, human trafficking, trespassing, and more.

Even if your city is not on the list, it can take just one crime to change your life forever. None of us really wants to take that chance, if it is possible to secure ourselves from real possible threats.

This is why it is important to lock our doors and windows at night and consider all legitimate dangers. However, one of the most overlooked weaknesses in our homes, cars, businesses, schools, places of worship, and more is our glass windows and doors.

It only takes seconds for criminals to break glass and gain entrance into almost any building or vehicle through glass.

To help you affordably secure your weakest and most vulnerable areas, Armitek currently offers free, no-obligation, 58-point professional security

evaluations to help you protect what matters most.

According to US News, the following are the 25 most dangerous cities in 2024 in descending order:

25. Winston-Salem, North Carolina
24. Vallejo, California
23. Nashville, Tennessee
22. San Antonio, Texas
21. Seattle, Washington
20. San Francisco, California
19. Houston, Texas
18. Dayton, Ohio
17. Philadelphia, Pennsylvania
16. Chattanooga, Tennessee
15. Portland, Oregon
14. Springfield, Missouri
13. Salt Lake City, Utah
12. Milwaukee, Wisconsin
11. Minneapolis, Minnesota
10. Denver, Colorado
9. Myrtle Beach, South Carolina
8. Kansas City, Missouri
7. Cleveland, Ohio
6. New Orleans, Louisiana (Cont. p. 6)

Due to extensive expansion in the ballistic glass and window security film market, and to keep up with current growth, Armittek, in Orem, Utah, is currently hiring for the following positions:

- Glazier Supervisor
- Outbound Sales Representative
- Customer Service Representative
- Installation Technician
- Production Technician
